## Profile

Results-driven Frontend Developer with around 3 years of experience in React.js and modern web technologies. Expert in designing, developing, and optimizing responsive web applications using HTML5, CSS3, and JavaScript (ES6+). Proficient in React features such as Hooks, redux, and Context API, and experienced in integrating Restful APIs. Skilled with build tools like webpack and babel, and adept at performance optimization techniques including code splitting and lazy loading. Strong collaborator with experience in Agile environments and cross-functional teams.

## Education

**HIGHER SECONDARY CERTIFICATE (HSC || 12<sup>TH</sup>) | SCIENCE | JUNE 2017 | GANGNAPUR (H.S) HIGH SCHOOL, WEST BENGAL**

**BACHELOR OF TECHNOLOGY | JUNE 2021 | BRAINWARE GROUP OF INSTITUTIONS, WEST BENGAL(BARASAT)**

## Experience

**FRONTEND DEVELOPER | BRIDGELABZ SOLUTIONS| JAN 2021 – FEB 2022**

I completed an 8-month internship as a Frontend Developer at BridgeLabz Solutions, where I gained hands-on experience with React.js, HTML, CSS, and JavaScript. My role involved developing and maintaining user interfaces, ensuring they were responsive and visually appealing. I worked on integrating APIs to fetch and display dynamic data efficiently. I collaborated closely with backend teams to ensure seamless data flow and improve the performance of the application. This internship helped me sharpen my skills in front-end technologies and build real-world applications using modern web development tools.

**FRONTEND DEVELOPER | BAJAJ BROKING LTD | APRIL 2022 - PRESENT**

- Led the design and implementation of complex single-page applications (SPAs) using React and SCSS. Enhanced overall application performance and scalability by employing best practices in state management and component architecture. Utilized React Hooks and middleware to manage application state efficiently, resulting in a smoother and more responsive user experience.
- Worked closely with UX/UI designers to translate wireframes and prototypes into fully functional user interfaces. Coordinated with backend developers to integrate APIs and ensure seamless communication between frontend and backend systems. Ensured that UI components were aligned with backend services, which facilitated smooth data flow and improved application consistency.
- Implemented advanced performance optimization techniques to improve application load times and user interactions. Employed code splitting, lazy loading, and memoization strategies to minimize initial load times and enhance runtime efficiency. Conducted performance audits and used tools such as Lighthouse to identify bottlenecks and make data-driven improvements to the application's performance.

## PROJECTS:

## E-KYC AND E-KYCHNI (Onboarding)

- Worked on the development of an Electronic Know Your Customer (EKYC) onboarding platform, designed to streamline the customer verification process for financial services. The platform aimed to offer a secure, user-friendly experience for customers to complete their KYC requirements online, improving efficiency and compliance with regulatory standards.
- Designed and developed reusable React components to create a consistent and scalable UI, including form inputs, verification steps, and user feedback elements.
- Integrated with backend services and third-party APIs to handle document uploads, and data validation.
- Used Axios for making HTTP requests and managing API interactions.
- Implemented client-side validation and encryption techniques to ensure that sensitive user information was securely transmitted and protected during the onboarding process.

## TELECALLER (Telecaller Assistance for EKYC Onboarding)

- Developed a frontend solution to enhance the Electronic Know Your Customer (EKYC) onboarding process by integrating a telecaller support system .
- The project aimed to address issues faced by clients during onboarding and enable telecallers to provide real-time assistance, thereby improving the overall customer experience and reducing onboarding friction.
- Designed and implemented a dedicated dashboard for telecallers using React.js. The dashboard included features for monitoring ongoing onboarding processes, viewing client statuses, and accessing real-time issue reports.
- Integrated tools within the dashboard that allowed telecallers to view client details, track progress, and provide instant support.

IAM (Identity Access Management): Developed and optimized an IAM system for managing user roles, permissions, and authentication with a focus on security and user management.

RM Portal (Risk Management Portal): Contributed to the development of a Risk Management Portal, providing tools for risk assessment, tracking, and reporting.

## Skills & Abilities

- REACTJS
- HTML5
- CSS3
- SASS
- Tailwind css
- JavaScript (ES6+)
- Performance Optimization
- Gitlab
- Material UI
- Ant Design
- Node.js(Basic)
- Nextjs(Basic)
- Moengage integration(ekyc)
- Clevertap integration(ekyc)
- Jest (unit testing)
- Version Control
- Adaptability
- Proficient with React Hooks

## Activities

Travel,Music and Badminton

## My Portfolio
